1/3 type High Resolution Camera

Refer to P.46

TK-C920E(A)/TK-C921EG(A)

540 TVL

Easy D/N

- ▶ 1/3 type high resolution IT CCD with 440,000 effective pixels
- ▶ 540 TV lines of horizontal resolution
- ▶ Easy day/night function
- ▶ Super LoLux™ sensitivity: 0.7 lx F1.2 (colour mode), 0.48 lx F1.2 (B&W mode)
- ▶ S/N ratio 50 dB (AGC off)
- ▶ Revolutionary integrated 10-bit DSP
- ▶ Automatic electronic shutter (AES) on/off
- ▶ Automatic gain control (AGC) on/off, max. 26 dB (colour mode)
- ▶ Auto tracking white balance (ATW) and manual: 2,300 K to 10,000 K
- ▶ Backlight compensation (BLC) on/off
- ▶ Sync systems INT/Line lock
- ▶ Support video/DC iris lens control
- ▶ C/CS lens compatible
- ▶ AC 24 V/DC 12 V (TK-C920E(A)), AC 230 V (TK-C921EG(A)) power supply

TK-C920E(A) rear

TK-C921EG(A) rear

1/3 type STD Resolution Camera

TK-C750E/TK-C751EG

- ▶ 1/3 type IT CCD with 290,000 effective pixels
- ▶ 330 TV lines of horizontal resolution
- ▶ Minimum illumination: 0.28 lx F1.2
- ▶ Auto tracking white balance (ATW) and One-touch auto white balance (AWB)
- ▶ Auto white balance adjustment range: 2,300 K to 10,000 K
- ▶ Automatic gain control (AGC), max. 26 dB
- ▶ S/N ratio 50 dB (AGC off)
- ▶ Backlight compensation (BLC) on/off
- ▶ Automatic electronic shutter (AES) on/off
- ▶ DC iris lens control
- ▶ Sync systems INT/Line lock
- ▶ C/CS lens compatible
- ▶ AC 24 V (TK-C750E), AC 230 V (TK-C751EG) power supply

TK-C750E rear

Focus Adjustment

TK-C925E rear

TK-C926EG rear

- ▶ 1/3 type high resolution IT CCD with 440,000 effective pixels
- ▶ Day/Night surveillance with auto IR cut filter on/off (Colour/B&W shooting)
- ▶ 540 TV lines of horizontal resolution
- ▶ Super LoLux™ sensitivity: 0.4 lx F1.2 (colour mode), 0.05 lx F1.2 (B&W mode)
- ▶ S/N ratio 50 dB (AGC off)
- ▶ Revolutionary integrated 10-bit DSP
- ▶ Built-in menu
- ▶ Automatic electronic shutter (AES) on/off
- ▶ Automatic gain control (AGC) off/on (HIGH/SUPER)
- ▶ Auto tracking white balance (ATW) wide, narrow, AWC and Manual Paint
- ▶ Backlight compensation (BLC) on/off
- ▶ Sync systems INT/Line lock
- ▶ Support video/DC iris lens control
- ▶ C/CS lens compatible
- ▶ Built-in display mode (CRT or LCD switchable)
- ▶ AC 24 V/DC 12 V (TK-C925E), AC 220–240 V (TK-C926EG) power supply

- ▶ 1/3 type high resolution IT CCD with 440,000 effective pixels
- ▶ Day/Night surveillance with auto IR cut filter on/off (Colour/B&W shooting)
- ▶ 540 TV lines of horizontal resolution
- ▶ Super LoLux™ sensitivity: 0.4 lx F1.2 (colour mode), 0.05 lx F1.2 (B&W mode)
- ▶ S/N ratio 50 dB (AGC off)
- ▶ Revolutionary integrated 10-bit DSP
- ▶ Scene file function for customer's parameter setting
- ▶ RS-422A/RS-485 remote control capability for camera setting
- ▶ Smart edge control mode (S.E.C.)
- ▶ Built-in menu
- ▶ Automatic electronic shutter (AES) on/off
- ▶ Automatic gain control (AGC) off/on (HIGH/SUPER)
- ▶ Auto tracking white balance (ATW) wide, narrow, AWC and Manual Paint
- ▶ Backlight compensation (BLC) on/off
- ▶ Sync systems INT/Line lock
- ▶ Support video/DC iris lens control
- ▶ C/CS lens compatible
- ▶ Built-in display mode (CRT or LCD switchable)
- ▶ AC 24 V/DC 12 V (TK-C1530E), AC 220–240 V (TK-C1531EG) power supply

Free software is available for camera control.

Camera menu content, including AGC level, IRIS level, scene memory setting/call, colour level, BLC area, can be set via PC.

1/2 type ExDR Day/Night Camera

TK-C1460BE

Refer to P.45 Refer to P.46

ExDR

IR ON/OFF

TK-C1460BE rear

- ▶ 1/2 type high sensitive IT CCD with 440,000 effective pixels
- ▶ Day/Night surveillance with auto IR cut filter on/off (Colour/B&W shooting)
- ▶ 480 TV lines of horizontal resolution
- ▶ Extended dynamic range (ExDR) function
- ▶ Motion detection with alarm signal output
- ▶ 10x digital zoom function
- ▶ Super LoLux™ sensitivity: 0.3 lx F1.2
- ▶ Minimum illumination: 0.00023 lx (32x slow shutter, B&W mode)
- ▶ RS-422A/RS-485 remote control capability for camera setting
- ▶ Auto tracking white balance (ATW)
- ▶ Automatic gain control (AGC) on/off, max. 23 dB
- ▶ Auto/Manual image correction with Backlight compensation
- ▶ Y/C video output
- ▶ Sync systems INT/Line lock, Full genlock

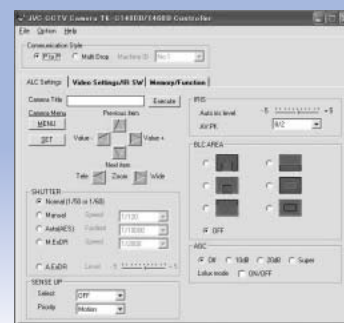

Free software is available for camera control.

Camera menu content, including AGC level, IRIS level, scene memory setting/call, colour level, BLC area and IR cut filter on/off, can be set via PC.

1/3 type WDR Camera

Refer to P.45 Refer to P.46

TK-WD310E(B)

WDR

Easy D/N

- ▶ 1/3 type digital image device with wide dynamic range (WDR)
- ▶ Innovative 14-bit DSP
- ▶ High-speed, automatic 5 level exposure control for each pixel
- ▶ 480 TV lines of horizontal resolution
- ▶ Easy day/night function
- ▶ Programmable camera menu system
- ▶ Auto tracking white balance (ATW), single-push and manual
- ▶ Automatic gain control (AGC) on/off, max. 34 dB
- ▶ 24 characters camera title
- ▶ Support video/DC iris lens control
- ▶ Ultra compact body
- ▶ AC 24 V/DC 12 V power supply

TK-WD310E(B) rear

Notes:

1. The WDR function will not operate with AGC or slow shutter mode engaged.
2. In very dark conditions the image quality may suffer slight deterioration.
3. Under fluorescent lighting, the colour balance may vary slightly.
4. All manufacturer utilizing this technology will experience similar phenomenon.

1/4 type Fixed Dome Camera

Refer to P.47

TK-C210FWE

500 TVL

Easy Flush Mount

Cover inside

- ▶ 1/4 type high resolution IT CCD with 440,000 effective pixels
- ▶ 500 TV lines of horizontal resolution
- ▶ Super LoLux™ sensitivity: 1.3 lx F2.0 (colour mode)
- ▶ S/N ratio 48 dB (AGC off)
- ▶ Revolutionary integrated 10-bit DSP
- ▶ Built-in fixed wide angle lens (f = 2.9 mm)
- ▶ Wide lens angle adjustment mechanism (350° H x ±80° V x ±175° R)
- ▶ Monitor video output (RCA) for easy camera setup
- ▶ Automatic gain control (AGC) on/off, max. 50 dB
- ▶ Auto tracking white balance (ATW) and manual: 2,900 K to 8,000 K
- ▶ Backlight compensation on/off
- ▶ Sync systems INT only
- ▶ Easy flush mountable without optional bracket
- ▶ AC 24 V/DC 12 V power supply
- ▶ As optional accessory, clear cover

IP52

Technical Information

- ▶ 1/4 type high resolution IT CCD with 440,000 effective pixels
- ▶ 27x zoom lens (f = 3.8 mm to 103 mm) and 10x electronic zoom
- ▶ Super LoLux™ sensitivity: 0.9 lx F1.4
- ▶ Minimum illumination: 0.0125 lx F1.4 (2x slow shutter, B&W mode)
- ▶ Day/Night surveillance with auto IR cut filter on/off (Colour/B&W shooting)
- ▶ Extended dynamic range (ExDR) function
- ▶ Variable panning/tilting speed
- ▶ Auto trace/Auto pan/Auto patrol/Auto return/Area title
- ▶ 360 degree endless rotation, 180 degree Auto flip/Digital flip
- ▶ 100 preset positions
- ▶ Meets IP52 water resistance standard
- ▶ Easy AF and One-push auto focus
- ▶ Built-in menu with Private mask, Motion detection and Auto black
- ▶ RS-422A/RS-485 interface
- ▶ Alarm terminal (input x 4, output x 3)

IR ON/OFF

Technical Information

- ▶ 1/4 type high resolution IT CCD with 440,000 effective pixels
- ▶ 25x zoom lens (f = 3.8 mm to 95 mm) and 10x electronic zoom
- ▶ Super LoLux™ sensitivity: 1.0 lx F1.6
- ▶ Minimum illumination: 0.015 lx F1.6 (2x slow shutter, B&W mode)
- ▶ Day/Night surveillance with auto IR cut filter on/off (Colour/B&W shooting)
- ▶ Extended dynamic range (ExDR) function
- ▶ Built-in menu with Private mask, Motion detection, and Auto black
- ▶ Auto trace/Auto pan/Auto patrol/Auto return/Area title
- ▶ Variable panning/tilting speed
- ▶ 360 degree endless rotation, 180 degree Auto flip/Digital flip
- ▶ 100 preset positions
- ▶ Easy AF and One-push auto focus
- ▶ RS-422A/RS-485 interface
- ▶ Alarm terminal (input x 4, output x 3)

12x PTZ Dome Camera

TK-C625E Limited availability outside EU

Refer to P.46 Refer to P.48

540 TVL

IR ON/OFF

Technical Information

- ▶ 1/4 type high resolution IT CCD with 440,000 effective pixels
- ▶ 12x zoom lens (f = 3.8 mm to 45.6 mm)
- ▶ Super LoLux™ sensitivity: 1.8 lx F1.6
- ▶ Minimum illumination: 0.075 lx F1.6 (B&W mode)
- ▶ Day/Night surveillance with auto IR cut filter on/off (Colour/B&W shooting)
- ▶ Built-in menu with Private mask and Auto black
- ▶ Auto trace/Auto pan/Auto patrol/Auto return/Area title
- ▶ Variable panning/tilting speed
- ▶ 100 preset positions
- ▶ Easy AF and One-push auto focus
- ▶ 360 degree endless rotation, 180 degree Auto flip
- ▶ RS-422A/RS-485 interface
- ▶ Alarm terminal (input x 1, output x 1)

Software for TK-C676E(B), TK-C655E(C) and TK-C625E

Free software is available for camera control.

Camera menu content, including AGC level, IRIS level, scene memory setting/call, colour level, BLC area can be set via PC.

For inquiries regarding control software, please access the following URL and select your country of residence.

http://www.jvc-victor.co.jp/english/company/contacts/hqpage_a2.htm

Remote Control Unit

Refer to P.41

RM-P2580E

System Information

- ▶ Dome camera preset position and menu setting for TK-C676E(B), TK-C655E(C) and TK-C625E
- ▶ Camera menu setting for TK-C1480BE/1481BEG, TK-C1460BE and TK-C1430E/1431EG
- ▶ Auto pan/Auto patrol/Area title
- ▶ Auto alarm operation
- ▶ Multi alarm inputs/outputs
- ▶ 8 video inputs/outputs with auto termination
- ▶ Built-in 8-ch sequential switcher function
- ▶ Operation lock function
- ▶ Interface: RS-485 for camera and RS-232C for external unit

Image device 1/4 type Interline Transfer CCD

Number of effective pixels 440,000 (752 H x 582 V)

Sync system Internal, Line lock

Video output Composite video signal
: 1.0 V (p-p), 75 ohms

Video S/N ratio 50 dB

Horizontal resolution 540 TV lines

Minimum illumination (typical) 3.6 lx (F1.6, AGC 20 dB, 50%, wide end)
1.8 lx (F1.6, AGC 20 dB, 25%, wide end)
< B&W mode > $\left\{ \begin{array}{l} 0.15 \text{ lx (F1.6, AGC 20 dB, 50%, wide end)} \\ 0.075 \text{ lx (F1.6, AGC 20 dB, 25%, wide end)} \end{array} \right\}$

White balance ATW/Manual
< ATW colour temp. range > < 2,300 K to 10,000 K >

Backlight compensation 4 patterns

Camera ID 16 characters

LENS

Zoom ratio 12x, 3.8 mm to 45.6 mm

Iris range F1.6 to F2.7

Zooming speed Approx. 2.0 s (max.)

Focus speed Approx. 1.2 s (max.)

MOVING MECHANISM

Panning 360° endless rotation

Tilting 0° to 90°

Panning speed 1.5 °/s to 180 °/s

Tilting speed 1 °/s to 120 °/s

GENERAL

Communication RS-422 or RS-485 (switchable), 9,600 bit/s

Power supply AC 24 V (50 Hz/60 Hz)

Power consumption 1.5 A

Operating temperature range -10 °C to 50 °C
< recommended > < 0 °C to 40 °C >

Dimensions ø 120 mm x 190 mm (H)

Weight 1.3 kg

RM-P2580E

Object cameras TK-C676E(B), TK-C655E(C), TK-C625E,
TK-C1480BE/1481BEG, TK-C1460BE
and TK-C1430E/1431EG

Number of connected cameras 8
(max.)

Cable length (max.) 1.2 km

Control terminals 4P push terminals (RS-485)

DATA I/O terminals (max.) 16

Alarm I/O (max.) 16

Unit alarm output 1 line (open-collector)

Auto output 1 line (open-collector)

CAM SW output 1

Dimensions (W x H x D) 300 mm x 75 mm x 203 mm

VIDEO LINES

Input 8 (BNC) / 8 through output (BNC)

Level Composite video signal
: 1 V (p-p), 75 ohms

Output 2 (BNC)

Power supply AC 230 V (50 Hz/60 Hz)

Power consumption 3 W

Operating temperature range -10 °C to 50 °C
< recommended > < 0 °C to 40 °C >

Weight 1.5 kg

9-ch Digital Video Recorder

Refer to P.41-P.42

VR-509E(A)

System
Information

DVD open

- ▶ Built-in DVD-R/RW drive for easy data export (DVD video format compatible)
- ▶ Built-in 320 GB (twin 160 GB) HDD
- ▶ High resolution 100 IPS (image per second) recording
- ▶ High quality MPEG-2 compression
- ▶ 9-ch real-time monitoring with multi-screen display **Refer to P.41**
- ▶ Digital audio recording and playback (2-ch)
- ▶ Remote surveillance via network (built-in web server/web viewer) **Refer to P.42**
- ▶ E-mail event notification
- ▶ Convenient manual search with Jog&Shuttle
- ▶ Various search function
- ▶ Recording recovery after power failure
- ▶ On screen display (Time/Date/Camera title/Alarm No./Operational state)
- ▶ Timer recording and Alarm/Emergency recording function
- ▶ Pre-alarm recording
- ▶ Motion detection function
- ▶ Digital watermark (optional software necessary for decoding)
- ▶ Multiple languages (English/German/French/Italian/Spanish)
- ▶ HDD mirroring
- ▶ NTP client function
- ▶ Covert channel function
- ▶ Passcode setting
- ▶ Operation lock
- ▶ Auto HDD scan
- ▶ Compact chasis design (340 mm wide)
- ▶ Expandable to 820 GB with the addition of an external 500 GB HDD

HDD External Unit (option)

VR-D0U

- ▶ Model to be connected: **VR-509E(A), VR-N900U**
- ▶ Selectable 500 GB, 1 TB, 2 TB

VR-509E(A) rear

 More than 2,161 hours = More than 3 months

Viewer Software for VR-509E

Refer to P.42

VR-TS500E

System
Information

- ▶ Central viewing software for multiple VR-509E(A) :
Up to 16 units of VR-509E(A) possible to register on a VR-TS500E
VR-TS500E displays up to 16 split video windows
- ▶ Connect to VR-509E(A) through LAN (Local Area Network)
Display of live images input in VR-509E(A)
Search, Playback and saving of images recorded in VR-509E(A)
Display of VR-509E(A) warning information
- ▶ Saving live images and playback images as still images and printing them output
- ▶ Integrated control of multiple VR-509E(A) (up to 16 units)
- ▶ Get hardware (VR-509E(A)) status information via VR-TS500E
(VR-509E(A) status/Operation log data/Recording log data)

Specifications

VR-TS500E		
Compatible model		VR-509E(A)
PC	Model	PC/AT compatible
	CPU	More than Pentium 4 2.4 GHz (required)
	Memory	More than 512 MB
	Graphic	Supports DirectX 9.0 * 1024 x 768 or better, 24-bit colour or higher (no common in main memory) Operation using ATI RADEON 9800 Pro and VIDIA GeForce FX5700 Ultra video cards verified
	Sound	Complied with AC97 (SoundMax recommended)
	Network	LAN: 10BASE-T/100BASE-T, WAN: (NAT, NAPT not supported) * Wireless LAN is not recommended due to its unstable operation
OS		Windows XP home (SP2) Windows XP pro (SP2)
Others		DirectX 9.0c Internet Explorer 6.0 (SP1) About 20 MB HDD of free space is required for installing the software and up to 5 GB HDD of free space as work area. A sufficient amount of free space on the hard disk is required for cutting a recorded image file.
Time Zone		Set the PC Time Zone setting to the same as the DVR "TIME ZONE" setting. When the time zone in DVR adopts daylight saving, please turn on the check box of "Automatically adjust clock for day/light saving charges" in "PC Time Zone".

Notes: To use VR-TS500E, VR-509E must be (A) version.

- ▶ Easy day/night function
- ▶ Focus adjustment function
- ▶ UP to 30 fps Motion-JPEG in VGA mode (640 x 480)
- ▶ Full hybrid with both analogue and IP output
- ▶ CF card slot for local alarm recording
- ▶ Access protection
- ▶ Built-in 10 BASE-T/100 BASE-TX interface
- ▶ FTP client/server function
- ▶ Multicast
- ▶ Built-in web server
- ▶ Motion detection function

VN-E4E

System
Information

- ▶ 30 fps at VGA (640 x 480) per channel offering 120 fps in total
- ▶ Direct connection with up to 4 analogue cameras
- ▶ JPEG compression
- ▶ Built-in 10 BASE-T/100 BASE-TX interface
- ▶ Pre/Post alarm recording
- ▶ External device control via RS-485/RS-232C
- ▶ Support for JVC and Pelco-D* protocol
- ▶ Two-way audio input/output
- ▶ FTP client function
- ▶ Support NAT/IP masquerade
- ▶ Multicast
- ▶ Built-in web server
- ▶ Motion detection function
- ▶ DC 5 V power supply

* PTZ dome camera only

Hybrid Digital Recorder for Both Network (IP) and Analogue cameras Powered by Milestone

VR-N900U

Viewer sample

- ▶ Pre-installed XProtect Enterprise software for user friendly and easy operation
- ▶ Can be used as a stand alone unit without PC or an edge device for XProtect Enterprise
- ▶ Hybrid recording solution with built-in 4-ch encoder
- ▶ Up to 9-ch recorder fully camera licensed
- ▶ Support Motion JPEG/MPEG-4 camera recording
- ▶ Built-in 250 GB with an additional expansion slot
- ▶ Frame rate Display: up to 60 ips at VGA
 Recording: up to 120 ips at VGA
 Distribution: up to 30 ips at VGA
- ▶ External storage up to 4 TB using the optional 2 units of VR-D0U
- ▶ Open platform for systems enabling integration of third party devices'

HDD External Unit (option)

VR-D0U

- ▶ Model to be connected: **VR-N900U, VR-509E(A)**
- ▶ Selectable 500 GB, 1 TB, 2 TB

Recording time schedule

The actual recording time varies depending on the camera settings, input image contents and condition of the hard disk. Use the table below as a guide to the recording time.

- 9-ch recording without audio recording or additional HDD upgrade (Hour).

Image size	Data/Image (kB)	Frame rate per second (each camera)							
		30	15	10	5	3	1	0.5	0.2
VGA	32	—	—	17	34	57	178	380	985
	24	—	—	24	48	80	245	514	1,321
	16	—	—	37	75	125	380	783	1,994
	10	—	—	62	123	205	622	1,267	3,204
QVGA	27	—	—	21	42	70	215	454	1,172
	15	—	—	40	80	133	406	837	2,128
	8	—	—	78	155	259	783	1,590	4,011
	5	—	—	126	252	420	1,267	2,559	6,432

Example: In case of 9 cameras / VGA 24 kB each / 5 frame rate each, 48 hours recording is possible.

Recording Server Software (Light Edition) for IP Cameras/Encoder

Refer to P.43

VN-RS800U

System
Information

- ▶ Basic function
 - Support up to 8 cameras
 - Frame rate: Display up to 16 fps per a camera (VGA)
 - Recording up to total 90 fps (VGA/REC only), up to total 60 fps (VGA/REC/Display)
- ▶ Live Display
 - Split mode (1/4/5/9/12/16) and automatic sequence
 - Camera control: VN-C30U/VN-C625U/VN-C655U(B)/VN-E4E + TK-C676 or TK-C655
- ▶ Recording function
 - Always REC or Manual REC selectable
 - Alarm recording/Timer recording
- ▶ Playback function
 - Search: Time & Date/Event
 - Snap shot (still): JPEG
 - Video file export & saving (AVI file)
- ▶ Alarm function
 - Alarm detect by camera (terminal/motion detect)
 - Automatic alarm recording with alarm message display

Viewer Software/Control Software

Refer to P.43

VN-S400U/VN-SE400U

System
Information

- ▶ Multi-viewer **VN-S400U**:
 - Up to 256 VN-C655U(B)/VN-625U devices can be registered and as many as 16 window displays and recordings are possible (display and recording change depending on the operating environment).
- ▶ External device controller pack **VN-SE400U**: 
 - This plug-in software is compatible with VN-S400U.
 - Object cameras: TK-C676E(B), TK-C655E(C), TK-C625E, TK-C1460BE, TK-C1480BE/1481BEG, TK-C1430E/1431EG and RM-P2580E.

Memory	More than 1 GByte		
HDD (for recording)	Installation area: 200 MB free space Recording area: internal drive RAID 5 recommended		
Video Card	1,024 x 768 recommended, 32-bit colour More than VRAM 16 MB (excludes main memory)		
Sound	Complied with AD97 (SoundMax recommended)		
LAN card	100 BASE-TX, 1000 BASE-T (recommended)		

Notes: Known problem when use VN-E4E.

When the frame rate is set to 7 or more, it cannot record or display.

VN-S400U	
Forms of provision	Fee charged for CD-ROM
Compatible models	VN-C1U, VN-C2U, VN-C3U, VN-C11U ver. 1.2+ VN-C30U ver. 1.3+ VN-A1U ver. 2.0+ VN-C625U, VN-C655U(B)
PC model	PC/AT compatible
CPU	Pentium III More than 1 GHz
Memory	More than 256 MB
HDD space	More than 20 MB
Graphic board	Supported DirectX
Display and Video card	More than 1,024 x 768 (recommended 1,280 x 1,024) More than True colour 24-bit
LAN card	100 BASE-TX
Compatible OS	Windows 2000 pro (SP4), Windows XP pro/home (SP1/1a)
Browser	Internet Explorer 6.0 (SP1)

Notes: VN-S400U is not compatible with VN-C30U JPEG multicast.

VR-N900U

Video recording	Motion JPEG/MPEG-4	Connectors (interfaces)	Ethernet 10 BASE-T/100 BASE-TX, RJ-45 Ethernet 1000 BASE-T, RJ-45 Serial (equivalent USB 2.0) x 5 (UPS, external HDD, mouse, joystick, USB memory) D-sub for RS-485 (for analogue PTZ camera control) D-sub 15 pin for analogue RGB monitor Signal input and output terminal (alarm in x 4, alarm out x 1, alarm reset x 1, emergency x 1, EXT REC IN x 1, OPE ON/OFF x 1, common x 3, warning out x 1, REC tally x 1, option out x 2) BNC x 4 (Video input) RCA x 2 (Audio input), RCA x 1 (Audio output)
REC frame rate	Up to 120 ips in VGA (total 9 cameras) Up to 180 ips in QVGA (total 9 cameras)	Processors and memory	CPU: Pentium 4 RAM: 512 MB
Display frame rate	Up to 60 ips in VGA (total 9 cameras)	Power supply	AC 120–240 V
Distribution frame rate	Up to 30 ips in VGA (total 9 cameras)	Operating temperature	5 °C to 40 °C
Frame rate for analogue camera input	Up to 20 ips (total 4 inputs) Up to 5 ips setting (each input)	Language support	Main menu: English Application menu: English, German, French, Italian, Spanish
Storage capacity	250 GB HDD optional expansion possible	Video access from remote PC	Live display, playback of REC/Camera control / make AVI file (After download VR-N900U viewer from VR-N900U, these operation possible)
Video channel	9 video channels	Minimum required remote PC environment (recommended)	OS: Windows 2000 pro, Windows 2000 server and advanced server, Windows XP pro (32 or 64 bit), Windows server 2003 (32 or 64 bit) CPU: Xeon recommended RAM: 1 GB recommended Network: Ethernet (more than 100 Mbps) Graphic card: AGP or PCI-Express, 1,280 x 1,024 recommended, more than 16 bit colour HDD: more than 50 MB Software: .NET Framework 2.0, DirectX 9.0, Internet Explorer 6.0 or higher
Resolution (VGA output)	1,024 x 768 / 1,280 x 1,024 / 1,600 x 1,200	Supported protocol	HTTP, SMTP (client), TCP, DHCP (client/IP lease), ARP, DNS (client), NTP
Camera live view	9 windows (max.)	Included accessories	Startup guide CD with User's Manual Power cords
PTZ support	IP PTZ camera: VN-C625U/VN-C655U(B) Analogue PTZ camera: JVC-protocol & Pelco-D protocol through RS-485 connector (PTZ only)	Dimensions (W x H x D)	420 mm x 370 mm x 88 mm
Alarm recording	Recording control by rear terminal Using IP camera alarm signal able to record	Weight	7.7 kg
Alarm recording frame rate	The frame rate for alarm recording can be specified independently from the frame rate of normal recording		
Scheduled recording	Various recording set up is possible such as weekly		
Manual recording	Recording start/stop for all 9-ch can be controlled by front panel swith		
Playback	Playback control by Jog/Shuttle		
Synchronized playback	Sync playback for 9-ch is possible		
Search for recording	Search by time/date/event (only time/date by front panel)		
Video clip export	Export is possible converting to AVI file JPEG (still) also possible		
Time synchronization	The date and time can be synchronized with an external NTP server		
System alarm notification	ALARM OUT x 1 WARNING OUT x 1 RECORD TALLY OPTION OUT 1/2		
Security	Protected by username/password		

Mounting drawings and specifications

Object cameras: TK-C920E(A)/921EG(A) [P.2], TK-C925E/926EG [P.3], TK-C1530E/1531EG [P.3], TK-C1460BE [P.4], TK-C1430E/1431EG [P.4], TK-C1480BE/1481BEG [P.5] and TK-WD310E(B) [P.5]

3 Wide dynamic range function

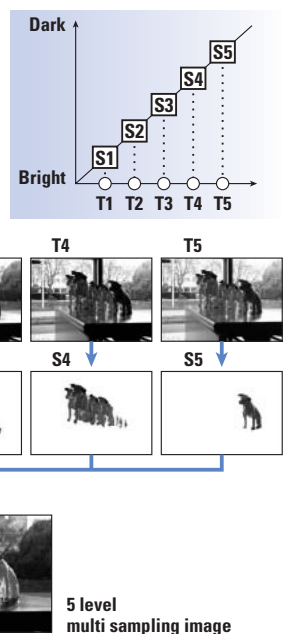

Extended dynamic range (ExDR)

Under adverse backlighting conditions, conventional cameras can not make clear images. In this case, images in dark areas become almost black as pitch and images in bright areas become almost white. JVC's new digital signal processor (DSP) circuit, which enables the realization of a wide dynamic range function, solves these problems. By capturing clear images through the use of a low-speed shutter in dark areas and a high-speed shutter in bright areas and then combining these two images, a uniformly easy-to-view image can be achieved.

Wide dynamic range (WDR)

JVC's innovated technology featuring a wide dynamic range function performs by multi sampling method. TK-WD310E(B) automatically adjust luminance by pixel with 14-bit digital processing as well as implement 5 level multi sampling, in order to realize an accurate colour reproduction.

Selection guide for JVC line-up

	Morning	Day light	High contrast	Evening	Night time
ExDR					
TK-C1480BE	Auto iris normal mode	Auto tracking white balance (ATW)	ExDR mode	AGC mode	AGC mode slow shutter (Intermittent picture)
TK-C1481BEG			Colour		
ExDR (W/IR on/off)					
TK-C1460BE	Auto iris normal mode	ExDR mode	AGC mode	IR cut filter off	
TK-C1430E/1431EG		Colour		B&W mode	
WDR					
TK-WD310E(B)	Auto iris normal mode	WDR mode	AGC mode	Easy day/night	
		real time response		B&W mode	
		Colour			

Advantage for each model

	Advantage	Summary	Application example
ExDR			
TK-C1480BE	• 0.3 lx F1.2, 25% video	• ExDR image output	• Casinos
TK-C1481BEG	• 0.01 lx under slow shutter	• Menu/RS-422A/RS-485 interface	• Traffic
	• S/N ratio 50 dB		• Town centre
ExDR (W/IR on/off)			
TK-C1460BE	• 0.3 lx F1.2, 25% video (TK-C1460BE)	• ExDR image output	• Banks
TK-C1430E/1431EG	• 0.45 lx F1.2, 25% video (TK-C1430E/1431EG)	• Menu/RS-422A/RS-485 interface	• Retail shops
	• S/N ratio 50 dB	• Day/Night function (IR)	• Prison
WDR			
TK-WD310E(B)	• 14-bit high speed digital process	• WDR image output	• Bank ATM
	• Realize high speed WDR with 5 level multi sampling each pixel	• Ultra compact body	• Train (platform)
		• Easy day/night function	• Entrance

4 IR cut filter on/off function

IR ON/OFF

IR cut filter makes it possible to capture both colour, black and white images with just one camera. This is done by turning the filter to "ON" when shooting in sunlight during the day for colour images and turning it to "OFF" at night for black and white images. Therefore continuous twenty-four-hour surveillance is possible thanks to this function.

* Noise will briefly occur on the screen when switching to the IR cut filter.

Spectral sensitivity characteristics of the CCD

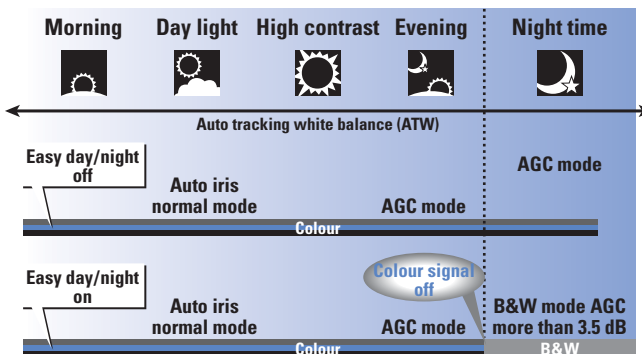

Object cameras: TK-C925E/926EG [P.3], TK-C1530E/1531EG [P.3], TK-C1460BE [P.4], TK-C1430E/1431EG [P.4], TK-C676E(B) [P.15], TK-C655E(C) [P.15], TK-C625E [P.15], VN-C625U [P.29] and VN-C655U(B) [P.29]

5 Easy day/night function

Easy D/N

Camera uses colour mode when the object is bright, and black and white mode when it is dark. (In this mode, AGC is always active regardless of the setting.)

Object cameras: TK-C920E(A)/921EG(A) [P.2], TK-VVD310E [P.5], TK-C215V4E [P.6], TK-C215V12E [P.7], TK-C215VP4E [P.8], TK-C215VP12E [P.8], VN-C20U(A) [P.28], VN-C205U [P.27], VN-C215V4U(A) [P.28] and VN-C215VP4U(A) [P.28]

6 Focus adjustment function

Focus Adjustment

When the focus adjustment function is turned "ON", the lens iris is focused fully open for about 30 seconds before returning to its original position. This results in a shallow depth of field (high-speed shutter) and makes it much easier to adjust focus.

What is depth of field? When a video is taken with the lens focused on the main object, there is a zone in which objects both in front of and behind the main object appear to be in focus. This zone is referred to as the "depth of field". When the zone of acceptable focus is broad, the depth of field is said to be "deep", and when the zone is narrow, the depth of field is said to be "shallow". If the depth of field is deep, the video will appear to be in focus from front to back. If the depth of field is shallow, however, only the main object will actually be in focus.

Depth of field	Shallow	Deep
Lens	Tele angle	Wide angle
Exposure	Open	Narrow
Position of object	Close	Far

Object cameras: TK-C925E/926EG [P.3], TK-C1530E/1531EG [P.3], TK-C215V4E [P.6], TK-C215V12E [P.7], TK-C215VP4E [P.8], TK-C215VP12E [P.8], TK-C205U [P.27], VN-C215V4U(A) [P.28] and VN-C215VP4U(A) [P.28]

7 Vandal resistant

Vandal Resistant

Results

Weight: 3.6 kg Height: 1.83 m	Weight 1.5 times more Weight: 5.4 kg Height: 1.83 m	Weight twice times Weight: 7.2 kg Height: 1.83 m
OK	OK	OK

After performing this standard test the dome cover did not sustain any cracking. The test was repeated with twice the initial test weight and again there was no evidence of cracking.

8 Easy installation

Easy Installation

With an all aluminum die-cast camera case and specific poly carbonate cover, these TK-C215VP cameras can withstand various rough environments while having a tough vandal resistant structure. While it is tough on vandals and adverse environment conditions, this camera is user friendly. The following pictures illustrate the easy installation process of the new JVC TK-C215VP series.

1. Pull out the camera unit by loosening the screws. *1

2. Mount the camera base to the ceiling using conduit. *2

3. Slide the camera unit into the camera base and gently push until locks-in with a click.

4. Using a screwdriver secure the camera unit to the base by tightening the 2 screws.

5. Adjust the angle and focus testing with the dome cover.

6. After lens setup, install silica gel bag and fit the inner cover.

7. Install and secure dome cover using supplied Allen hex wrench. Installation completed!

*1: These procedures showed by photos for leaflet and actually camera base and dome cover connected by a fall prevention wire.
*2: After wiring, video connectors should be inserted into camera unit.

Object cameras: TK-C215VP4E [P.8], TK-C215VP12E [P.8] and VN-C215VP4U(A) [P.28]

9 Dust and water protection (IP code)

Degrees of protection provided by electrical machinery and apparatus enclosures

IP52

IP66

IP-□□

Protection
International

Degrees of protection against water

Second characteristic numeral	Degree of protection (summary)	Degree of protection (definition)
0	No protection	—
1	Protected against vertically falling water drops	Vertically falling water drops shall have no harmful effects
2	Protected against vertically falling water drops when the enclosure is tilted up to 15 degrees	Vertically falling water drops shall have no harmful effects when the enclosure is tilted at any angle up to 15 degrees
3	Protected against spraying water	Water sprayed vertically toward either side of the enclosure at an angle of up to 60 degrees shall have no harmful effects
4	Protected against splashing water	Water splashed against the enclosure from any direction shall have no harmful effects
5	Protected against water jets	Water projected from a nozzle in jets against the enclosure from any direction shall have no harmful effects
6	Protected against powerful water jets	Water projected from a nozzle in powerful water jets against the enclosure from any direction shall have no harmful effects
7	Protected against the effects of temporary immersion in water	Temporary immersion of the enclosure in water under standardized conditions of pressure and time shall have no harmful effects
8	Protected against the effects of continuous immersion in water	Continuous immersion of the enclosure in water under conditions that shall be agreed upon between the manufacturer and user but which are more severe than those for numeral 7 shall have no harmful effects

Degrees of protection against solid foreign objects

First characteristic numeral	Degree of protection (summary)	Degree of protection (definition)
0	No protection	—
1	Protected against solid foreign objects of 50 mm diameter and greater	The object probe, a sphere with a 50 mm diameter, shall not fully penetrate
2	Protected against solid foreign objects of 12.5 mm diameter and greater	The object probe, a sphere with a 12.5 mm diameter, shall not fully penetrate
3	Protected against solid foreign objects of 2.5 mm diameter and greater	The object probe, a sphere of 2.5 mm diameter, shall not penetrate at all
4	Protected against solid foreign objects of 1.0 mm diameter and greater	The object probe, a sphere of 1.0 mm diameter, shall not penetrate at all
5	Dust protected	Penetration of dust is not totally prevented, but dust shall not penetrate in a quantity to interfere with satisfactory operation of the apparatus or to impair safety
6	Dust tight	No penetration of dust

* Information regarding close proximity with dangerous places has been omitted. * The full diameter of the solid probe shall not pass through the external opening.

Object cameras: TK-C215VP4E [P.8], TK-C215VP12E [P.8], TK-C676E(B) [P.15], VN-C215VP4U(A) [P.28], WB-1540U [P.38-P.40] and WB-1550U [P.38-P.40]

10 Easy flush mount

Easy Flush Mount

TK-C215 series uses an unprecedented flush mount installation method with which installation is as simple as ninety-degree rotation of the three L-shaped mounting brackets stored in the dome camera to secure it in place. No extra brackets are required. With this new method, installation can be completed in nearly one-fifth the time of our conventional surveillance cameras. Moreover, surface mounting is possible, too.

1. Remove the camera's outer cover and ceiling panel.

2. Once the camera has been inserted into the hole drilled in the ceiling, push in the screws and rotate them 90° clockwise.

3. After removing the screwdriver, the springs attached to the screws will stretch and the camera can be firmly secured to the ceiling.
Note: This must be carried out for all three screws.

4. Mount the ceiling panel to complete installation.

Object cameras: TK-C210FWE [P.6], TK-C215V4E [P.6], TK-C215V12E [P.7] and VN-C215V4U(A) [P.28]

11 Alarm zoom function

Alarm Zoom

TK-C215V12E and TK-C215VP12E has "12x lens", "alarm input interface", and "memory for 2 different lens position". Thanks to this memory function, the camera lens unit can be set for 2 lens position and the zoom-up mechanism will move from "regular position" to "another position" when alarm signal comes, for instance.

Object camera: TK-C215V12E [P.7] and TK-C215VP12E [P.8]

12 Various functions of PTZ dome camera

Auto flip (all models)

With the function switched on, the camera automatically flips over 180 degrees when it reaches its tilting limit, making it possible for the camera to continue displaying right-way-up images once it has gone through the vertical.

Digital flip (TK-C676E(B), TK-C655E(C) and VN-C655U(B))

Digital flip inverts pictures on both vertical and horizontal axis once the tilt reaches 135 degrees, after the camera has passed through the vertical axis.

Auto pan (all models)

Use the Auto pan screen to set the Auto pan function, which allows the camera to be revolved slowly in a horizontal direction. Auto pan function has three modes, the return mode for continual movement between two positions, the right mode for clockwise rotation and the left mode for counterclockwise rotation.

Auto trace (VN-C625U and VN-C655U(B): Auto tour)

Auto trace function lets the operator repeat a series of manual camera operations performed over a period of 30 seconds. When Auto trace mode is activated, the 30 seconds sequence of manual operations is memorised and then automatically repeated every 30 seconds.

Auto patrol (all models)

This function allows the camera to automatically move to multiple positions based on the preset position, sequence and time.

Auto return (all models)

The camera can be set to return automatically to its original position or to restart a specified operation (Auto pan or Auto patrol) at selected intervals.

AF for IR (all models)

Auto focus function activates when switching from colour to black and white or vice versa, ensuring clear pictures even during switching.

Motion detection (all models except TK-C625E)

The image view is divided into 48 separate sectors. In the setup menu the user can designate the sectors where movement is to be auto-detected, so triggering an alarm signal. The setup menu is smart and this serves to eliminate false alarms, making the JVC's PTZ dome camera very reliable surveillance device.

Object cameras: TK-C676E(B) [P.15], TK-C655E(C) [P.15], TK-C625E [P.15], VN-625U [P.29] and VN-C655U(B) [P.29]

13 Relationship between focal length and field of view

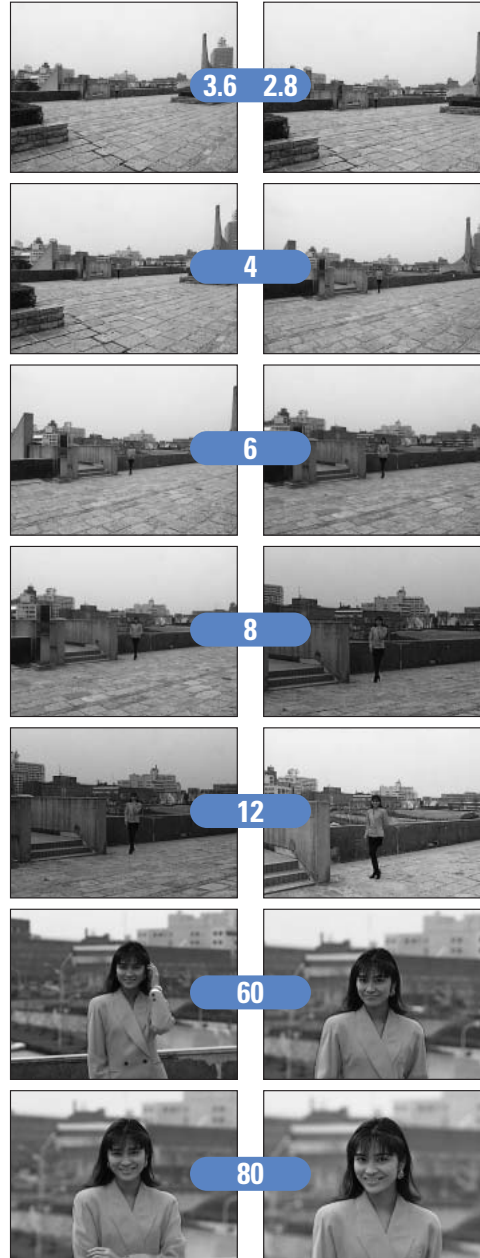

1/2"

1/3"

Lens focal length

Simplified chart

Lens focal length (mm)	Horizontal angle of video (degree)	Vertical angle of video (degree)
3.6	81°	66°
4.8	67°	53°
6	56°	44°
8	44°	33°
12	30°	23°
16	23°	17°
69	5.3°	4°
100	3.7°	2.7°

Simplified chart

Lens focal length (mm)	Horizontal angle of video (degree)	Vertical angle of video (degree)
2.8	81°	66°
4	62°	48°
4.8	53°	41°
6	44°	33°
8	33°	25°
12	23°	17°
16	17°	13°

• This shooting is an image that was taken with a distance of 10 meters between object and camera.

Formula

$$W = \frac{X}{f} \times L$$

$$H = \frac{Y}{f} \times L$$

$$(H = \frac{3}{4} W)$$

- Image range of monitor (width, height and angle) is 10 % less than that of actual data.
- Due to distortion that occurs with a wide-angle lens, actual angle of taken image will be wider than calculated value.

Parameter chart

CCD size	1/2"	1/3"	1/4"
X	6.4	4.8	3.6
Y	4.8	3.6	2.7

W = Width of video (m)
H = Height of video (m)
f = Focal length of lens being used (mm)
L = Distance between object and camera (m)

14 Network specific information

IP address

What is a private (local) IP address?

Private IP address is an IP address that can be used freely as a LAN network address without being connected to the Internet.

What is a global IP address?

Global IP address is an IP address that is assigned to a device connected to the Internet. This address is indispensable for carrying out transmissions via the Internet.

"192.168.0.2" is the IP address set in the initial settings for JVC's V.Networks.

Example:

Simultaneous access by multiple users

The frame rate (or bit rate), which refers to the number of images that can be transmitted by V.Networks within a second, is decided according to the specifications of V.Networks. Within the range of specification approximately 10 users can simultaneously access V.Networks. However, when a large number of users simultaneously access V.Networks, there may be a decline in the frame rate or image quality.

Unicast and Multicast

Unicast transmission

Since unicast involves one-to-one transmission between two terminals (e.g. between a camera and a monitoring PC), it is necessary for the bandwidths to be equivalent to the number of terminals when identical information is to be acquired by several terminals.

Multicast transmission

Since multicast is used to transmit a single packet to multiple terminals, the data transmission volume decreases regardless of the number of terminals. Multicast requires a compatible network device.

* Remote surveillance via the Internet cannot be carried out with a multicast system.

* Multicast systems require an optimum network design.

PoE (Power over Ethernet)

PoE

PoE supplies the electric power to the network camera by using LAN cable (Cat 5). Easy installation like JVC analogue cameras is available with single cable. It doesn't require data cable and AC power cable separately.

PoE compliant network switch or power injector is required for PoE installation.

Alarms

V.Networks has two inputs and two outputs alarm terminals (except VN-E4E: input x 4/output x 1). Either a less voltage a-contact or c-contact output-type alarm input sensor should be employed. Since alarm output is NPN open collector output, NPN open collector output must be converted to less-voltage a-contact output when using a general sequencer. In addition, it is important to note that the GND must be connected to a control device. In the event that the control device has no GND, the V.Networks GND should be connected to the COM terminal. When distributing an alarm to several multi-viewers (VN-S400U) with a single camera, it is possible to register up to 5 distribution addresses for up to 10 for JVC's V.Networks (except VN-C20U(A)).

File size

JPEG recorded file size calculation for 1 camera

JPEG data size per image (approximate data)

Resolution	Compression rate (kB)						
	1	2	3	4	5	6	7
160 x 120	9	6	4	3	3	3	2
320 x 240	22	15	10	9	8	7	6
340 x 480	59	37	24	19	17	16	15
640 x 480 (fine mode)	65	41	27	21	19	18	17

Example:

Camera setting: Resolution 320 x 240, Compression rate 2, Frame rate 2 fps

Q: What is the file size for 1 day recording ?

A: 15 (kB) x 2 (fps) x 86,400 (s) = 259,200 (kB) = **2.59 (GB)**

Q: How many days is the recording possible with 40 GB HDD ?

A: 40 (GB) ÷ 2.59 (GB) = 15.444 = **15 (days)**

Maximum recorded file size

The maximum recorded file size vary depending on the application and Windows file system.

Maximum recorded file size (JPEG)

Application software		Windows file system	
Standard controller	VN-RS800U/VN-S400U	FAT32	NTFS
2 GB	No limitation	4 GB	2 TB

For long recording, it is recommended to use VN-S400U and NTFS file system. The VN-S400U possesses a function that allows them to automatically separate recording files every hour on the software side. For example, if you record for three days straight, 72 recording files will automatically be created. (24 hours/day x 3 days = 72 hours)

JPEG network traffic

Data size per image x Frame rate x 8 (bit/byte) x 1.2 (overhead)
= JPEG network traffic

Example:

Q: What is the network traffic if the camera setting is resolution 320 x 240, compression rate 2 and frame rate 5 fps ?

A: 15 (kB) x 5 (fps) x 8 (bit/byte) x 1.2 = 720 (kbps)

RJ-45 connector assign

Pin No.	T568A type	T568B type	Signal
1	Green/White	White/Orange	TD+
2	Green	Orange	TD-
3	Orange/White	White/Green	RD+
4	Blue	Blue	—
5	Blue/White	White/Blue	—
6	Orange	Green	RD-
7	Brown/White	White/Brown	—
8	Brown	Brown	—

Dual Stream (MPEG-4 & JPEG)

Dual Stream

As example, simultaneously able to use both monitoring by smooth MPEG-4 picture and recording by high quality JPEG.

Technical information for software developers

The following technical information are available for integrating V.Networks cameras into customers own application software or system.

API: UDP, HTTP data and other communication specifications that include the structure of control data, structure of JPEG data and some examples of sequence until JPEG data is acquired.

In order to receive these JVC confidential technical information, please contact local JVC sales office and enter into the license and non-disclosure agreements. These information are supplied on royalty free basis.

Local JVC sales office :

http://www.jvc-victor.co.jp/english/company/contacts/hqpage_a2.htm

A Automatic gain control (AGC)

Using a circuit built into the camera, gain control makes it possible to automatically maintain a constant output signal level even if there are changes in brightness. This makes it possible to obtain a picture with the same level of brightness regardless of whether it is taken in a dark or bright place. (Noise may slightly stand out.) When a strong signal exceeding the set level is input, signal saturation is prevented by controlling gain. In the event that a weak signal is input, the signal is raised to correspond with the set level and this fixed level is maintained.

Application program interface (API)

This refers to the instruction and function sets that can be utilized when developing software as well as the established rule set for the program procedures that are necessary for employing these instruction and function sets.

Automatic electronic shutter (AES)

This is a function that automatically controls the device output level according to the incident light amount by utilizing the electronic shutter function of a solid-state image device.

Auto negotiation

Auto negotiation is regulated by IEEE 802.3u. This function can be used to determine the appropriate transmission system for the corresponding device (Hub etc.) as well as select the optimum (highest possible speed) transmission method prior to transmission. When the corresponding device supports two or more of the transmission systems as well as the auto negotiation function, the high-priority items (fast transmission speed etc.) are given precedence. In the event that the corresponding device does not support the auto negotiation function, the transmission speed is automatically selected, but the automatic selection of full-duplex/half-duplex is not performed and half-duplex is always chosen.

Auto white balance (AWB)

When using CCD or film, pictures often come out reddish or greenish (orangish or bluish) in colour when taken under incandescent or fluorescent light. AWB makes it possible to adjust white colour balance under a wide variety of light sources. Automatic tracking (tracing) white balance (ATW), automatic white balance (AWB), automatic white balance control (AWC), manual mode and other features are available.

B Backlight compensation (BLC)

With backlight scene, the auto iris function responds to the bright portion of the screen, thus causing the iris to narrow and resulting in the "darkening of the subject" phenomenon. Backlight compensation is a function that can be utilized to correct this phenomenon.

C Category 5 (Cat 5)

This refers to the quality assurance of connection parts such as unshielded twisted pair (UTP) cables and connectors. With LAN, category 3 is primarily utilized. For 100 BASE-TX, category 5 and above are used, and category 5e and above are required for 1,000 BASE-T.

Charge coupled device (CCD)

A charge coupled device is a semiconductor device that converts images to electrical signals.

Closed circuit television (CCTV)

Refers to a system of cameras and video accessory devices over a internal cabling path. Differs from broadcast video.

Compact flash (CF)

This is the standard for memory cards advocated by San Disk Corporation, and is utilized as a storage device for digital cameras etc. Compact flash combines flash memory that does not go off even when the power is turned off and an I/O controller circuit on just one card.

Common intermediate format (CIF)

This is the universal video signal format regulated by ITU-T H.261. CIF supports moving images with a data rate of up to 30 frames per second and a resolution of 352 x 288 pixels.

CSMA/CD

This is an access control method utilized for ethernet transmissions. When collisions occur due to multiple terminals attempting to simultaneously make transmissions, the transmissions are stopped and then resumed after an appropriate amount of time has passed.

D Dynamic host configuration protocol (DHCP)

This protocol is employed to automatically allocate IP addresses to clients when they turn on their PCs and then retrieve these addresses from them when they switch off their computers. On the server side, it is only necessary to collectively prepare several DHCP-client-use IP addresses. It is also possible to simultaneously provide clients with information such as gateway addresses, domain names and subnet masks.

Domain name system (DNS)

This system is used to replace IP addresses, which are expressed on the Internet with numerals (e.g. 255.254.253.0), with domain names that are easy to remember. On the internet, there are servers referred to as DNS servers that have IP address and domain name tables. By connecting to DNS servers, users can access the server that possesses the IP address via the domain name.

Digital signal processor (DSP)

This processor converts the input analogue signal to a digital signal and then performs a variety of signal processing tasks. Thus, unlike analogue processing, it is possible to produce stable and clear images without signal degradation within the circuit.

Dynamic range

This refers to the range within which the reproduction of images can be performed without

adversely affecting gradation. The amount of light necessary for the luminance signal to reach the white peak at 100 IRE (100 % video level) is defined as 1, and this is the ratio of the amount of light with which it is possible to perform the reproduction of images without clipping even when more light comes in than the amount stated above. In general, this is expressed in dB, % and times.

E Electronic sensitivity up

This is a function used to increase sensitivity by lengthening image device storage time beyond the norm or adding image signals to image memory via frames or field units.

Electronic zoom

This is a function that employs the scanning variable of an image device or image memory rather than an optic lens to electronically enlarge or shrink the image on the screen.

Ethernet

This is the LAN standard devised by Xerox Corporation, DEC Corporation (currently a branch of Compaq Computer Corporation) and Intel Corporation, and has been standardized by the IEEE 802.3. CSMA/CD has been adopted for data transmission over networks.

F Firewall

This is a software system that is used to prevent unauthorized entry into an organization's computer network from the outside. It also refers to computers with built-in firewall systems.

Frame rate

This rate is established by JVC IP Products and refers to the number of frames transmitted per second for JPEG and MPEG-4 images. The maximum frame rate is fixed for each image size depending on the specifications of the respective JVC IP Products models.

File transfer protocol (FTP)

This is one of the communications protocols used when exchanging files over the Internet. FTP is employed as the standard Internet file transfer method. Selecting FTP can often save time when downloading.

FTP client function

This is a JVC IP Products (VN-C655U(B)/C625U/C205U/C20U/E4E) function that makes it possible to periodically (range of values: 0 to 86,400 seconds) upload images (JPEG still images only) to any FTP server.

FTP server function

This refers to the JVC IP Products (VN-C655U(B)/C625U/C205U) user page storage function. By utilizing any FTP client software program, HTML or JPEG image signals independently created by the user can be uploaded to VN-C655U(B)/C625U/C205U.

Full duplex

This is a transmission method by which it is possible to send and receive data simultaneously.

F number

This is a number that represents lens brightness; the smaller number, the brighter lens. The relationship between brightness (F number), focal length (fl) and effective diameter (D) is described by the following equation: $F = fl/D$.

G Genlock

This is a type of external sync system with a function that synchronizes external sync signals with frequency and phase. There are three types of genlock input signals: composite sync signals (composite SYNC), composite video signals (VBS or VS) and black burst signals (BBS).

H Half duplex

This is a transmission method by which data cannot be sent and received simultaneously, but rather can only be transmitted in one direction at a time.

Hyper text transfer protocol (HTTP)

This is a protocol used by World wide web (WWW) servers and web browsers for sending and receiving information such as files.

The institute of electrical and electronics engineers 1394 (IEEE 1394)

This is a next-generation, high-speed SCSI standard used to connect computers with peripherals and other devices. Both daisy-chain connections of up to 63 devices and tree connections are made possible by this protocol. The transfer speeds of 100 Mbps, 200 Mbps and 400 Mbps have been standardized.

I Iris

The iris controls the amount of light taken in by the lens when changes in illumination occur. A manual iris lens is used when luminance is fixed, and an auto iris lens is used in cases when luminance changes according to the time of day.

J Java applet

This is a small program that is distributed from a WWW server to a web browser (client) and then executed by the Web browser. It is used for the purpose of adding movement to the screen. When viewing the image of JVC IP Products (VN-C655U(B)/C625U/C205U/C20U/E4E) on Internet Explorer or Netscape, this program is utilized to display moving images.

Joint photographic coding experts group (JPEG)

This is a standard established by ITU-TS (International Telecommunication Union: formerly known as CCITT) and ISO (International Organization for Standardization) that decides the compression and expansion of colour still images. This technology makes it possible to compress still images from a scale of 1/10 to 1/100. Although one of the disadvantages of this is that both compression and distribution are time consuming, compressibility can be modified; this means that by altering the degree of deterioration in image quality during compression it becomes possible to choose from among image quality, file size and processing time.

L Local area network (LAN)

This refers to the connection of multiple computers or peripherals over a network within a confined area such as the same building, site or organization. Correspondingly, a computer network that goes beyond buildings or sites to connect LAN between remote locations is referred to as a wide area network (WAN).

Lens mount

Cameras have different types of lens sockets including C mount, CS mount and bayonet mount. C and CS mounts are screw-type mounts; C mounts have a flange focal length of 17.526 mm and CS mounts have a flange focal length of 12.5 mm. Bayonet mounts are often employed in three-chip cameras and this type of mount conforms to the standard for studio-use cameras.

Line lock

This is a function that synchronizes the camera's vertical synchronizing signal with the frequency of the commercial power supply. The function can be used to reduce hum noise induction to the video signal and illumination flicker. If the image output of several cameras is switched, vertical synchronization disturbance, which occurs on the screen, can be prevented.

M Media access control (MAC) address

This refers to the unique address allotted to all devices connected to LAN, and is represented as a 16 base, 12 digit, 48-bit (6 byte) address. The high 3 bytes are assigned by the device's vendor ID and the low 3 bytes are assigned by a unique number from the vendor.

Minimum illumination

The minimum level of object illumination required for security cameras is referred to as "minimum illumination". The lower this value is, the higher the sensitivity of the camera. This value also serves as an indication of how dark of a place shooting can be carried out in. It should be duly noted that minimum illumination changes depending on both the F number of the lens being used and the reflectance of the object. If a security camera is used at a level close to the minimum illumination, the image may become blurred. Since this is undesirable, we recommend that sufficient illumination be used.

Motion detection

This is a function that alerts you with an alarm when there is motion in the image.

Motion-JPEG

This is a technology that makes it possible to decompress still JPEG images at a high speed as well as make them appear as if they are moving by showing them in succession. This can also refer to the moving image data or the codec that performs compression/decompression. Unlike MPEG data, which only records differential information between the frames of a moving image, Motion-JPEG makes it possible to edit any portion of a moving image because each frame is saved as a still image.

Moving picture coding experts group/**Moving picture experts group (MPEG)**

There are numerous standards such as MPEG-1, MPEG-2 and MPEG-4 for technologies utilized to compress digital moving images. MPEG-1 takes into account storage/playback on storage media such as CD-ROM and has playback quality equivalent to that of VTR. MPEG-2 takes into consideration usage with broadcast media and has playback quality equivalent to that of HDTV. MPEG-4 is aimed at the distribution of low-quality images at a high compression rate through the use of a low-speed network.

Multicast

This is a method that makes it possible to simultaneously transmit the same data to several specified computers.

N Network address port translation (NAPT)

Network address port translation is the official name for IP masquerade. This technology is used to effectively utilize scarce IP address resources by converting IP addresses and TCP/IP port numbers between two networks (WAN/LAN).

Network address translation (NAT)

This technology makes it possible to mutually convert private and global IP addresses as well as transparently access these addresses. NAT functions are incorporated in a router.

Network time protocol (NTP)

NTP is a time information protocol that is used as a standard on the Internet. SNTP is a simplified version of NTP.

O OLE control extension (OCX)

OCX is a software component based on OLE 2.0. Although the correct term is OLE control, the filename extension is "OCX", and therefore it is primarily referred to as OLE control extension. It is also called Active X.

OSI reference model

This model shows the protocol guidelines and its functions are separated into a total of seven layers. The upper layer of the model, which is closest to human interface, consists of three layers: the application layer, the presentation layer and the session layer. The lower layer, which is used for transmission purposes, consists of four layers: the transport layer, the network layer, the data link layer and the physical layer.

P Personal computer memory card international association (PCMCIA)

PCMCIA stands for personal computer memory card international association and regulates cards and slots related to PC cards.

Port address translation

This technology is used to convert IP addresses and TCP/UDP port numbers between two networks (WAN/LAN) and effectively utilize scarce IP address resources. This is also referred to as IP masquerade or NAPT.

Port number

This is the upper layer process of an IP that accepts information from the lower layer. TCP and UDP network protocols are identifiers used to differentiate between programs.

Protocol

This term refers to the rules of transmission. Protocol provides a definition of the procedures that should be followed when sending and receiving data.

Q QoS

Short for "Quality of Service", a networking term that specifies a guaranteed throughput level. One of the biggest advantages of ATM over competing technologies such as Frame Relay and Fast Ethernet, is that it supports QoS levels. This allows ATM providers to guarantee to their customers that end-to-end latency will not exceed a specified level.

Quarter common intermediate format (QCIF)

With QCIF, the resolution of CIF is reduced in similar proportion by half and the resolution becomes 176 x 144 pixels. The number of pixels is one-fourth that of CIF and this format supports moving images at a data rate of up to 30 frames per second.

Quality level

This is used for JVC IP Products' JPEG images to determine to what extent the original image should be compressed. There are settings for either seven levels or three levels (high, medium and low). Quality level is closely related to image quality and the lower the degree of compression, the higher the image quality; however, this also causes the volume of data in the image file to increase. The default setting is either "2" or "Medium".

R Redundant array of independent disks (RAID)

This is referred to as a RAID disk array and is a means by which multiple hard disks can be combined to be utilized like a single disk and reliability and processing speed can be increased. Although there are seven different types of RAID ranging from RAID 0 to RAID 6, only RAID 0, 1, 5 and combinations of these types are actually used.

Resolution

Resolution is the scale used to express the degree to which a screen is clear or blurred. Both horizontal resolution and vertical resolution are indicated using actual numbers and are also employed as scales for representing camera performance. In fact, horizontal resolution is generally utilized to compare performance. It can be said that the higher number, the better performance of camera. Ordinarily, a televised TV broadcast with fairly good horizontal resolution has a resolution of around 330 TV lines.

Real-time transport protocol (RTP)

This is a transmission protocol used for streaming playback of sound or images. In UDP-type protocols, for which packet-loss countermeasures, transmission time guarantees, etc. are not implemented, effective bandwidth and delay time are usually sent to the server via RTCP. The server adjusts the quality of the data to be sent via RTP according to the transmission status information it has received and then sends the data.

S Smear

This is a phenomenon in which vertical streaks appear above and below brightly lit spot lights or objects in images with especially high luminance. When an excessive amount of light enters a solid-state image device, an unnecessary electric charge occurs in the vertical transfer section, thereby causing this phenomenon.

Simple network management protocol (SNMP)

This is a protocol used to form a network management system on a TCP/IP network. There is a manager and an agent; the manager inquires about network management information and the agent responds to these inquiries. The manager function is performed by an exclusive SNMP manager software program and the agent function is carried out by telecommunications equipment such as a router or Switching-Hub.

T Transmission control protocol (TCP)

This is an OSI reference model transport layer protocol that is utilized as a standard on the Internet. Although TCP is highly reliable due to the fact that it has a retransmission control mechanism, it has a low transmission speed.

Transmission control protocol/Internet protocol (TCP/IP)

This is a standard Internet protocol that is comprised of a protocol that specifies a communications software program (application) and then establishes a data transmission channel (TCP), and a protocol related to communication pathways (IP).

U User datagram protocol (UDP)

This is utilized as an OSI reference model transport layer protocol. Although UDP has low reliability due to the fact that it has no retransmission control mechanism, it has a high transmission speed.

Uninterruptible power supply (UPS)

This is a device that can be used to supply power for a fixed period of time in the event of an unexpected power outage so that PCs can be shut down safely.

V Voice over IP (VoIP)

This technology makes it possible to place telephone calls over an IP network. Although the internet can be used as a phone line, the call quality of internet phone is generally not very high because transmission speed and delay cannot be guaranteed.

W Wide dynamic range function **WDR Refer to P.45**

This refers to a function through which various processes are performed, thereby making it possible to capture clear images even when there is extreme backlighting.

Author, Director and Editor: Kazufumi Namise, Kenji Nikki
